Directions

Read the following passage carefully and answer the questions based on the passage:

Mary Wollstonecraft was a prolific feminist critic and philosopher who achieved prominence with the publication of A Vindication of the Rights of Women in 1792. When Wollstonecraft died in childbirth, Godwin wrote a memoir that discusses her love affairs with Henry Fuseli and Gilbert Imlay, which made Wollstonecraft's private life public and brought disgrace to her.

Wollstonecraft's work critiques the position of women in a patriarchal set-up, which is highly misogynistic in nature. Her writings serve as an example of a proto-feminist approach, which tends to discuss how women accept their subjugation and accept slavery as a duty. Wollstonecraft stressed the importance of education for women. In A Vindication of the Rights of Women, Wollstonecraft rejects the conventional approach, which categorised women as naturally weak and inferior to men. She sees education as the only means to enable women to participate in society and believes that the lack of education keeps women in a secondary position. Her idea, that women play a crucial role in shaping a society through their participation in bringing up children, was downrightly rejected by the Marxist-feminist thinkers.

Q86. Why is Mary Wollstonecraft regarded as a foundational figure in feminist theory?

(a) She wrote extensively about women's rights and directly challenged the notion that women were naturally weak and inferior
(b) She focused only on her own experiences, without addressing the larger social issues affecting women and their treatment as mere property
(c) She argued that women should stay within domestic roles and avoid intellectual pursuits
(d) She believed women did not need education and supported traditional gender expectations

Q87. What central argument does Wollstonecraft make in A Vindication of the Rights of Woman?

(a) Women ought to recognize their inferior position as a natural obligation and therefore should not dispute the current social order.
(b) Women's education is a necessity for their active and equal participation in society, thus overthrowing the male-dominated social structure.
(c) Women are by nature fit for the house and should not engage in the intellect, as the quest for knowledge would disturb the social order.

YourMockTest.com — Free Study Material

(d) The advancement of society is dependent on the confinement of women to domestic roles and the maintenance of the male-dominated structure.

Q88. Why did Wollstonecraft face public criticism after her death?

(a) Her writings were viewed as too radical and were seen as a challenge to established religious beliefs.
(b) She openly rejected motherhood and family life in her published works.
(c) Details of her personal life, including her love affairs, became public.
(d) She advocated Marxist-feminist ideas, which were not widely accepted during her era.

Q89. In what ways did Wollstonecraft's feminist approach stand in contrast to that of Marxist-feminist thinkers?

(a) She limited her examination to economic equality, neglecting the cultural and social side of gender discrimination
(b) She maintained that class struggle was a more important factor than gender equity in the pursuit of social justice
(c) She regarded patriarchy as an illusion and considered women to be instinctively suited for the home
(d) She highlighted the importance of motherhood in society's development, which wasn't considered by Marxist feminists

Q90. Which idea best reflects Wollstonecraft's critique of patriarchy?

(a) Women's subordination is seen as a moral duty, but through education, they can be made to understand and contest their position.
(b) Women are naturally inferior and should be limited to domestic responsibilities, which include taking care of their family
(c) Gender inequality is so entrenched that it cannot be addressed through social reform; that's why people should accept the patriarchal setup without any protest
(d) Intellectual pursuits for women only result in family discord, which is why they should not break free from their pre-defined roles
